

1. A socket wrench comprising:
 - a handle, a solid neck portion and an annular head;
 - a ratchet mechanism in said annular head;
 - wherein said handle, said neck portion and said annular head are formed
- 5 from a polymer.

2. The wrench claimed in claim 1 wherein said polymer is nylon 6.
3. The wrench claimed in claim 2 wherein said nylon is glass fiber reinforced nylon 6.
4. The wrench claimed in claim 3 wherein said handle is hollow.
5. The wrench claimed in claim 4 wherein said wrench includes a plurality of sockets located in said hollow handle and further comprises a removable cap at the end of said handle.

6. A socket wrench comprising:
 - a hollow handle storing a plurality of sockets;
 - a solid neck extending between said handle and an annular head;
 - a ratchet mechanism molded into said head;
- 5 wherein said handle; said neck, and said annular head are formed from a polymer.
